

## FUEL OX™ STAR PLUS

### *Sludge Dispersant & De-Icer*

As the winter months approach, the drop in temperature creates a threat of the overall efficiency and performance of fuel oil systems. These low temperatures can create inadequate conditions for home heating oil systems to operate properly or even start.

Fuel Ox™ Star Plus is designed to improve the efficiency of the fuel systems that are treated while greatly reducing common fuel related issues and service calls during the winter months. This includes stabilization, gelled fuel and ice, sludge buildup, water and microbial contamination, and corrosion.

Bio-blend fuels degrade more quickly and gum up the interior components of fuel systems. Fuel Ox™ Star Plus prevents the oxidation of fuel and keeps bio-blends stable.

**8 OUNCES TREATS 275 GALLONS**

### **BENEFITS**

- Reduces pour point by 25 degrees
- Stabilizes fuel
- Contains anti-oxidant components to prevent degradation of bio-diesel blends
- Improves combustion and fuel system efficiency
- Prevents sludge buildup
- Cleans and lubricates fuel system
- Reduces filter plugging and clogging
- Removes water
- Prevents microbial growth
- Inhibits tank corrosion
- Can be used in bio-blend fuels and kerosene
- Reduces fuel related service calls

### **RECOMMENDED USAGE**

#### *Winter Use*

- Before the onset of cold weather, pour one 8oz bottle of Fuel Ox™ Star Plus directly into fuel tank for every 275 gallons.

#### *Summer Use*

- To stabilize fuel for off season, double dose to ensure peak fuel system efficiency.
